Welcome!

"Motivated Data Analyst with a solid background in statistical analysis, data visualization, and problem-solving. Proficient in Excel, SQL, Python, Power BI, and Tableau for cleaning, analyzing, and presenting insights from complex datasets. Experienced through academic projects and internships, with a strong drive to apply analytical skills in supporting business growth and decision-making."

Education

SRM University , B.Tech in Computer Science	Aug 2021 – May 2024
Panimalar polytechnic college , Diploma in electronics communication engineering	july 2018 – Mar 2021

Experience

Junior Data Analyst intern , TrueinfineWORX – Hyd, Mar 2024 – May 2025

- Collected, cleaned, and analyzed datasets to extract meaningful insights. interactive dashboards and reports using tools like Tableau, Power BI, or Excel to visualize key business metrics
- Performed data wrangling and preprocessing using SQL and Python to ensure data accuracy and integrity.
- Developed and optimized SQL queries to retrieve relevant data from relational databases.
- Collaborated with cross-functional teams to support data-driven decision making and improve business strategies.
- Automated data workflows and reports to enhance efficiency.

Academic Projects

E-commerce sales and customer insights

- Analyzed large-scale e-commerce sales data to identify revenue trends and customer behavior.
- Performed RFM segmentation to classify high-value, loyal, and at-risk customers.
- Built interactive dashboards to track KPIs like revenue, AOV, and customer lifetime value.
- Conducted product performance and churn analysis to support data-driven decisions.
- Delivered insights that improved customer retention and optimized sales strategy.

Hotel Revenue, Demand Forecasting & Guest Intelligence Analytics

- Conducted end-to-end analysis of hotel booking, guest, and pricing data to uncover revenue drivers and demand patterns.
- Built advanced SQL data models and Python pipelines for data cleaning, feature engineering, and KPI calculation (ADR, RevPAR, LOS).
- Applied time-series forecasting techniques to predict occupancy and revenue for pricing and capacity planning.
- Developed executive-level Power BI/Tableau dashboards with drill-downs and automated data refresh.
- Delivered strategic insights on dynamic pricing, overbooking strategies, and guest segmentation to improve revenue and retention.

Blockchain-Based Tender Management System with Multi-Signature Wallet

- Designed and implemented a blockchain-based tender management system to enable secure, transparent, and tamper-proof procurement workflows.
- Integrated a multi-signature wallet mechanism to enforce multi-authority approvals before fund disbursement, reducing fraud risk.
- Automated the end-to-end tender lifecycle, including bid submission, bid locking, deadline enforcement, and smart contract-based winner selection.

- Developed secure backend APIs for blockchain interaction, real-time tender monitoring, and immutable audit trail generation.
- Delivered a compliant and auditable procurement solution that enhanced governance, accountability, and stakeholder trust.

Technologies

Languages: Python, Java, SQL

Database: MySQL, MongoDB

BI Visualization: MS Power BI, Ms Excel

Web Technologies: HTML, CSS, JavaScript

Frameworks: Bootstrap, Django, Node.JS, Angular.JS, REST API

DevOps and Version Control: GIT, CI/CD
